### DETAILED ACTION

1. Applicant's arguments filed on September 24, 2001 have been fully considered but they are not persuasive.

a. Applicants argue that Stover does not disclose or anticipate a porous polymeric layer with an average pore size between 0.2-10  $\mu\text{m}$ .

However, in Column 1, lines 33-35 of the Stover's disclosure a microporous film with pore sizes up to 1.2  $\mu\text{m}$  is taught.

Regarding the materials of the fabric and the porous polymeric layer, these are taught by the Stover's reference on Claims 4 and 8.

### *Claim Rejections - 35 USC § 102*

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

3. Claims 10-17 are rejected under 35 U.S.C. 102(b) as being anticipated by Stover (US 5,208,098).

Stover discloses a self-bonded nonwoven web and porous film composite comprising at least one layer of a self-bonded, fibrous nonwoven web comprising substantially continuous filaments adhered to at least one layer of a polymeric porous film and having vapor-permeable and liquid-impermeable properties. (Abstract)

The reference further teaches a microporous film with pore sizes up to 1.2 microns. (Column 1, line 35). Further it teaches that the web comprises a thermoplastic selected from the

Art Unit: 1771

group consisting of polypropylene and polyester among others. (Claim 4) The reference further discloses that the polymeric porous films can be prepared from any suitable film-forming polymeric composition, such as polyolefins, polyamides, polyesters and the like. (Column 8, line 1).

The prior art is found to disclose each chemical and structural feature instantly claimed, therefore it must meet the property requirement specified, otherwise, applicant's claim is incomplete. Note ex parte SLOB (157 USPQ 172), which supports this position.

2. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the mailing date of this final action.

3. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Norca L. Torres-Velazquez whose telephone number is 703-306-5714. The examiner can normally be reached on Monday-Thursday 7:30-5:00 pm and alternate Fridays.
